TECHNICAL SKILLS

Frontend | TypeScript, JavaScript, CSS, ReactJS, Vite, Webpack, Storybook, styled-components, react-query

Backend | Kotlin, Java, Spring Boot, Coroutines, PostgreSQL, MongoDB, SQS/SNS, RabbitMQ

Deployment & Tools | AWS, GitHub, DevOps, Incident Management, Infrastructure as Code

EXPERIENCE

Engineering Manager | Closelink

Nov 2022 – Present

Leading technology platform for the maritime industry, focused on the procurement of ship consumables

- Guided career and personal development of mid- and senior-level software engineers
- Facilitated company-wide OKR training and helped other departments refine their objectives and key results
- Set up hiring plan for the engineering department and conducted interviews for software engineers
- Introduced a new build toolchain that decreased build times 10x in the React/AngularJS application
- Led team through an important project with a tight deadline and completed the work 2 weeks ahead of schedule

Senior Software Engineer | Closelink

Feb 2022 – Nov 2022

- Prepared and designed large feature and integration (with third-party platforms) projects
- Defined the career track model for the individual contributors in the engineering department
- Introduced TypeScript as the main frontend programming language to improve reliability and developer experience
- Guided the engineering team and supported management board with facilitating and adopting the OKR process

Senior Software Engineer | FREE NOW

Oct 2020 – Jan 2022

Europe's leading multi-mobility platform offering ride-hailing, micro-mobility services, and car sharing

- Technical design, implementation, and deployment of new features and projects across teams
- Lead contributor and initiator of the company open-source design system ([freenowtech/wave](#))
- Supported backend developers as chapter coordinator to align and improve processes across teams and locations
- Conducted technical hiring interviews and created guidelines to evaluate candidates fairly and equally
- Adjusted team processes including branching model, deployment strategies, and pull request management to increase time to production by 1 - 2 days per user story

Software Engineer | FREE NOW

Feb 2018 – Sep 2020

- Technical planning and implementation of individual stories and projects in the front and backend
- Cross-team collaboration on engineering projects including preparing a hand-over of projects to a new team
- Collaborated with the design department to draft initial design system capabilities

Software Engineer | white label eCommerce

Feb 2017 – Jan 2018

Independent direct-to-fan ticketing and e-commerce platform

- Planned and implemented new features and bug fixes for the frontend and monolithic backend
- Collaborated with an external consultant on the adoption and implementation of the AngularJS frontend framework
- Wrote user documentation and planned and executed regular deployments for the application

EDUCATION

Apprenticeship (Software Engineering), Berufliche Schule ITECH (BS 14), Germany

2017

Allgemeine Hochschulreife, Gymnasium Lohbrügge, Germany

2014

Student Exchange (6 months), Smithfield State High School, Australia

2012

LANGUAGES

German, Native speaker

English, Highly proficient

French, Duolingo beginner ;)
